

1 Abstract

2 Preface

3 Critical Context

3.1 Deferred Shading

3.2 Distributed Rendering

3.3 Development framework

3.3.1 Programming language

3.3.2 Compiler

3.3.3 Code editor - Debugger tool

3.3.4 Version control

3.3.5 Project directory structure

3.4 Third party libraries

3.4.1 Asio

3.4.2 Assimp

3.4.3 Freeimage

3.4.4 Glm

3.4.5 Lz4

4 Methods

4.1 Requirements

4.2 Design

4.2.1 Network

4.2.2 Scene management

4.2.3 Render control

4.3 Implementation details

4.3.1 OpenGL

4.3.2 Vulkan

5 Evaluation

5.1 Testing scenarios and results

5.2 Analysis – Results discussion

6 Conclusion

7 Further work

8 Bibliography
